## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

#### **IN THE CLAIM:**

In claim 1, line 7, --controller-- has been added after "loop".

#### ***Allowable Subject Matter***

2. Claims 1-18 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claim 1 recites, inter alia, said controller comprising at least one delay control circuit adapted to delay delivery of said pulse width modulated signal to at least one of said first and second switches to preclude simultaneous conduction of said first and second switches and minimizes dead time between state transitions of said first and second switches, said delay control circuit detecting a phase difference between state transitions of said first and second switches and providing a delay in accordance with a magnitude of said phase difference.

Claim 8 recites, inter alia, a feedback loop controller comprises at least one delay control circuit adapted to delay delivery of said pulse width modulated signal to at least one of said first and second switches to preclude simultaneous conduction of said first and second switches, said

delay control circuit detecting a phase difference between state transitions of said first and second switches and providing a delay corresponding to a magnitude of said phase difference.

Claim 14 recites, inter alia, method comprising detecting a phase difference between state transitions of said first and second switches, generating a variable duration delay in accordance with a magnitude of said phase difference, and delaying delivery of said pulse width modulated signal to at least one of said first and second switches by the variable duration delay, wherein simultaneous conduction of said first and second switches is precluded and dead time between state transitions of said first and second switches is minimized.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include her of the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. J. Han whose telephone number is 571-272-2078. The examiner can normally be reached on Mon-Fri 5:30am-2:00pm.
